

# Arrowsmith PROGRAM

*Strengthening Learning Capacities™*

## ADDRESSING LEARNING DIFFICULTIES A Cognitive Approach

**Presentation by:**  
**Debbie Gilmore, Executive Director  
of Arrowsmith Program**

Learning difficulties do not have to be lifelong. A cognitive program can identify and strengthen the underlying causes of learning difficulties, using the principles of neuroplasticity.

**Date:** February 15, 2019

**Time:** 9:00am  
Attendees are invited to visit the Arrowsmith Program classroom following the presentation.

**Location:**  
Dallas Christian School  
1515 Republic Pkwy  
Mesquite TX 75150

In this presentation, Debbie will describe a number of learning difficulties, from those that impact the learner in school as well as in daily life. The focus will be on learning difficulties that impact academic performance, such as reading and writing, and some of the research studies demonstrating brain-related change and enhanced cognitive and academic performance as a result of engaging in a cognitive approach to addressing learning difficulties.
